Developer Relations Engineer and Technical Marketer with 4+ years at the intersection of code, content, and community. I build developer programs end-to-end - from API documentation and SDK walkthroughs to content campaigns that drive awareness, funnel developers into products, and turn early adopters into evangelists. Equally comfortable shipping a working Python demo, designing a multi-format content calendar, and presenting on a conference stage. My work has grown communities from 0 to 4K+, driven 40% increases in product awareness, reduced onboarding drop-off by 20%, and helped products reach developers who actually build with them.

PROFESSIONAL EXPERIENCE

Developer Relations Engineer (Contract) | Zerops

June 2026 – Present

- Own documentation, Discord community support, and multi-format content (written, video, social) for the platform
- Authored competitor comparison documentation (vs. Railway, Render, Heroku, Fly.io) shipped to production docs
- Leading onboarding workstream for the Mate/Box product launch - OSS recipes, landing pages, and competitive positioning research against Devin, AMP, E2B, and Daytona
- Coordinated the Zerops Challenge hackathon (with WeMakeDevs), including community feedback curation and post-event reporting
- Position ZCP as a core platform differentiator through GTM-focused technical content

Developer Advocate (Contract) | Optextity

Jan 2026 – May 2026

- Architecting Optextity's DevRel function from zero - defining content pillars, community channels, and a developer onboarding journey that takes users from signup to first successful integration
- Producing multi-format technical content (tutorials, API guides, video walkthroughs, sample projects) as part of a cohesive content strategy mapped to the developer adoption funnel
- Running awareness and engagement campaigns targeting developer personas across Twitter/X, Discord, and LinkedIn - building brand presence in a competitive AI tooling market
- Partnering with product and engineering to surface developer pain points, prioritize DX improvements, and ensure the roadmap reflects real community needs

Developer Relations Engineer | Payman INC · US (Remote)

March 2025 – August 2025

- Designed and executed a full-funnel developer content strategy - launching "Payman Chronicles," a serialized content campaign blending API tutorials, product storytelling, and founder narrative that grew the community from 0 to 4K+ followers in 4 months
- Content campaigns drove a 40% lift in product awareness and directly influenced investor conversations, demonstrating how developer marketing can move both technical and business audiences simultaneously
- Built and published TypeScript and Python SDK walkthroughs with runnable AI agent demos - hands-on resources that gave developers a working starting point and shortened time-to-first-integration
- Ran a developer funnel audit: identified the highest drop-off touchpoints, redesigned onboarding docs and support flows, and cut integration abandonment by 40%
- Closed the product feedback loop by translating community signals into engineering priorities - directly responsible for 15+ DX improvements shipped to production

Developer Advocate | Upsurge Labs & Instadapp · Bengaluru

January 2024 – February 2025

- Sister companies, same core team. Ran DevRel strategy across both AI products (Cosmo AI, LemmeBuild) and Web3 (Avocado Wallet) simultaneously.
- Owned the full content strategy for two product lines - planned editorial calendars, defined audience segments, and produced 20+ technical guides on AI integration, prompt engineering, and agent orchestration that became the top organic traffic sources for both products
- Designed and ran a monthly workshop series averaging 100+ developers per session - pairing live coding demos with product education to drive adoption while building Upsurge's reputation as the leading AI education brand in India

- Built a hands-on content library (Python demos, Streamlit apps, Flask backends, Google Colab notebooks) that cut workshop onboarding time from 30 minutes to under 5 - enabling more time on actual product exploration
- Developed an Ambassador Program from scratch: defined the program structure, recruited and trained 50+ community advocates, and created a self-sustaining grassroots distribution engine across Indian Web3 communities
- Led Avocado Wallet's DevRel expansion - integrated 8+ blockchain networks, contributed to EVM compatibility improvements, and scaled the developer user base through targeted ecosystem outreach and technical content
- Worked cross-functionally with design, product, and engineering to align developer feedback with the AI feature roadmap - ensuring the community's voice shaped what got built

Director of Developer Relations | Valist Inc • US (Remote) June 2022 – August 2023

- Built and led global DevRel for a Web3 software distribution protocol - producing documentation, technical content, and campaign assets that served 500+ active developers across multiple ecosystems
- Executed a conference marketing strategy spanning 5+ international events (ETHGlobal, DevCon, and others) - running workshops for 50–200 developers per event and converting attendees into active platform users
- Negotiated and closed 15+ ecosystem partnerships, expanding protocol integrations and establishing Valist as infrastructure developers could build on with confidence

LEADERSHIP & COMMUNITY

Lead Governor | H.E.R DAO India

March 2023 – January 2024

- Led community programming for 200+ underrepresented developers across India - designed the workshop curriculum, ran mentorship tracks, and built a support network that helped members enter Web3 careers

Technical Writer | Twilio Voices Program

February 2022

- Authored SendGrid API tutorials reaching 10K+ developers - among the program's highest-performing educational content by readership and engagement

SKILLS & EXPERTISE

Technical: Python, JavaScript/TypeScript, React, Next.js, Node.js, HTML/CSS, Tailwind, REST APIs, Streamlit, Flask, Google Colab, GitHub, Postman, Prompt Engineering

Content & Marketing: Content Strategy, Editorial Planning, Developer Campaigns, Technical Writing, API Documentation, SEO-driven Documentation, Storytelling, Multi-format Production (written, video, live)

DevRel & Community: Community Building & Growth, Ambassador Programs, Developer Onboarding, Funnel Analysis, Workshop Design, Conference Speaking, Ecosystem Partnerships, Feedback Loops

Tools: Figma, VS Code, JIRA, Notion, Discord, Twitter/X, LinkedIn, Google Analytics

EDUCATION

BE in Computer Science • Vel Tech High Tech, Chennai, Tamil Nadu • CGPA: 8.3 • 2022
